|   |   \---Robot.txt
|   \---Images and Icons
\---www.tradexpress.co
    +---[Build & Deployment Files]
    \---root
        \---Admin
```

2. Directory Partition Breakdowns

Offline Folders & Online Folders

- **Offline Folders:** Dedicated local storage for isolated assets, local databases, and offline runtime logs.
- **Online Folders:** Staging area for remote cloud synchronization, GitHub integration files, and Vercel deployment assets.

PortableApps & Tools

- **PortableApps:** Houses modular standalone tools categorized into *Databases*, *DevTools*, and *Utilities* to prevent C: drive bloat and system registry dependencies.
- **Tools:** Stores standalone installers, portable package archives, and administrative scripts for rapid system re-deployment or server cloning.

tradexpress & www.tradexpress.co

- **tradexpress:** Core project environment containing custom application source code, AppData manifests, templates, and graphic assets.
- **www.tradexpress.co:** Dedicated domain and web routing directory handling production build structures and administrator configurations.
